Homework: Hotdogs_Web

URL for Hotdogs orders: https://placideshema.github.io/Web-Programming/How_3/hot-dogs.html

URL for extra_credit: https://placideshema.github.io/Web-Programming/How_3/Extra.html

Question: What do you think of JavaScript as a programming language compared to C++?

- Javascript has some features used the same as C++, like syntax, loops, arrays, and much more. However, Javascript is known for web development and has more concepts designed for it.

Note: The work is hosted on GitHub, and I used both internal CSS and Javascript
